

# BOVINE BLUELITE<sup>®</sup> PELLETS

by TechMix

## Rehydrate. Recover. Perform.

Bovine BlueLite<sup>®</sup> Pellets is the only electrolyte available on the market in a ready to use pelleted form. Bovine BlueLite Pellets facilitate and enhance thermal regulation. Stimulating cooling mechanisms and impacting nutrient utilization during heat stress improves dry matter intake, milk production, and reproductive performance.

**KEY FUNCTIONAL COMPONENTS:** Buffered Electrolytes, Potassium, Magnesium, Sodium Chloride, Osmolytes, Multiple Energy Sources, Zinc Amino Acid Complex, Live Yeast

### FEATURES & BENEFITS

- Encourages water intake
- Helps improve dry matter intake
- Replenishes electrolyte balance
- Helps improve milk production
- Restores electrolyte balance in fresh cows
- Patented pelleting technology delivers Bovine BlueLite effectively in a convenient form
- Provides added nutrients, electrolytes, and fluid-balancing osmolytes to help avert metabolic issues and restore health

### WHEN TO USE

- During periods of heat stress
- Post-freshening to help with transition

### DIRECTIONS FOR USE

Top dress, or mix in the TMR or grain portion of the dairy ration.

- During mild heat stress and fresh cow pen – 4 oz. per head per day
- During severe heat stress – 6 oz. per head per day

### AVAILABLE PACKAGE SIZES - CONTROL NUMBER

50 lb bag                      22418-372
