## Scouring Calf Protocol

### STEP 1:

#### Calf Renova

#### Clean the calf's GI tract.

Bio-active components with anti-microbial properties and resistant DFM

Give one capsule of Calf Renova and repeat on day 2 or 3 as needed (do not exceed 3 boluses)

Available sizes: 12 or 36 boluses per jar

### STEP 2:

#### Calf Sci-Lyte

#### Rehydrate and reinstate electrolyte balance.

Electrolytes, energy, glycine, fructo-oligosaccharides

Days 1 & 2: Feed 2 quarts of the Sci-Lyte solution twice daily to scouring calves.

Available size: 3.3 lb. jar

### STEP 3:

#### Sci Mic CB

#### Repopulate the GI tract with beneficial microflora.

High dose of live & viable beneficial microorganisms

Give one bolus of Sci Mic CB per day starting on the next day after Calf Renova administration.

Available size: 30 boluses per jar

### STEP 4:

#### Calf Formula D

#### Maintain and perpetuate a beneficial microflora.

Live & viable beneficial microorganisms

Mix one gram per day of Calf Formula D with pasteurized milk, milk replacer, or water.

Available sizes: 1.1 lb. or 11 lbs.
