

CALF BIO PRO w/STEALTH 5™

Calves - Environmental Challenges

Concerns: Stressful situations for calves, such as scours, transitions, dehorning, and castration.

A protein supplement for young calves that aids the young calf in microbial crude protein production - beneficial for superior growth and health throughout life.

Benefits:

- All-natural protein supports microbial protein production in the rumen.
- B-vitamin complex to stimulate appetites and immune function for stressed calves.
- Added chelated trace minerals enhance bioavailability and utilization.
- Yeast extract and mannans to stimulate immune function and inhibit pathogens binding to intestinal wall.
- A stable form of Vitamin C added to stimulate and strengthen immune system.
- Bio-secure product in 125# tub.

Suggested Feeding: Calves should consume 0.13 to 0.19 pounds (2 to 3 oz.) per head per day. Offer this product in an area where cows cannot access Calf Bio-Pro.

Caution: Do not feed to sheep. This product contains added copper and should not be fed to sheep or other species with low copper tolerance.

HI-PRO 21 STALK BUSTER 30

Supplemental Feeding - Protein

Concerns: Added protein for medium quality forage, added energy for consistent intakes.

Protein supplement for stalk grazing or range feeding. Products are highly fortified to "bridge-the-nutritional gap" for cattle on low quality forages. Easy and convenient to use and formulated to provide consistent intake.

Benefits:

- Source of soluble protein (NPN).
- Added chelated trace minerals improve bioavailability and utilization.
- Fiber digester added to unlock nutrients in pasture, forages, and feed.
- B-vitamin complex to stimulate appetites and immune function.
- Bio-secure product in 250# tub.

Suggested Feeding: Hi-Pro 21: Intake goals of 3 to 8 ounces per head per day. Stalk Buster 30: Intake goals of 1/2 to 1 lb. per head per day. Provide fresh, clean supply of water at all times. Free-choice salt when feeding Hi-Pro 21 or Stalk Buster 30.

Caution: Do not feed to sheep. This product contains added copper and should not be fed to sheep or other species with low copper tolerance.

BOVINE STRESS LIC w/STEALTH 5™

For Stress - Off-feed - Reproduction

Concerns: Stimulate appetite, reduce stress, and improve reproductive performance.

High-energy, free-choice supplement fortified to meet the stress challenges of shipping, weaning, breeding, or comingling cattle. Formulated with high levels of vitamins, organic trace minerals, and digestible ingredient sources. Designed for beef and dairy cattle.

Benefits:

- B-vitamin complex to stimulate appetites and immune function for stressed cattle.
- High levels of chelated trace minerals improve bioavailability and utilization.
- Fiber digester added to unlock nutrients in pastures, forages and feeds.
- Yeast extract and mannans to stimulate immune function and inhibit pathogens binding to intestinal wall.
- High levels of Vitamin E for reproduction response.
- Bio-secure product in 250# or convenient 40# tub.

Suggested Feeding: Intake goals of 4 to 8 ounces daily. Provide fresh, clean supply of water at all times. Free choice salt when feeding Bovine Stress Lic.

Caution: Do not feed to sheep. This product contains added copper and should not be fed to sheep or other species with low copper tolerance.

MINERAL LIC

Consistent Mineral Intakes

Concerns: Variable, low-quality forages, and inconsistent intakes.

Complete, balanced mineral designed to complement cattle on pasture, dry-lot, legume or grass forages. Fiber digester added to stimulate fiber digestion and utilization of forage. Designed for cattle only.

Benefits:

- Flexible to be used on pastures, dry-lots, or range feeding.
- Added chelated trace minerals improve bioavailability and utilization.
- B-vitamin complex to stimulate appetites and immune function for stressed cattle.
- Encapsulated Vitamin C added as antioxidant.
- Bio-secure product in 250# tub.

Suggested Feeding: Intake goals of 3 to 5 ounces daily. Provide fresh, clean supply of water at all times. Free choice salt when feeding Mineral Lic.

Caution: Do not feed to sheep. This product contains added copper and should not be fed to sheep or other species with low copper tolerance.

ALL-PURPOSE 14

Pasture/Protein Supplement

Concerns: Late season pastures, low quality forages.

Balanced protein product designed to support late season pastures or when low quality forages are fed. This product contains added Vitamins A, D, & E and used when forages are below acceptable nutritional levels. Offers flexibility in feeding applications.

Benefits:

- Fiber digester added to unlock nutrients in pastures, forages and feeds.
- Energy dense formulation when low quality forages are fed.
- All-natural molasses protein sources ideal for cattle, horses, goats, and bison.
- Added chelated trace minerals improve bioavailability and utilization.
- Bio-secure product in 250# or convenient 40# tub.

Suggested Feeding: Intake goals of 3 to 8 ounces daily. Provide fresh, clean supply of water at all times. Free choice salt when feeding All-Purpose 14.

Caution: Do not feed to sheep. This product contains added copper and should not be fed to sheep or other species with low copper tolerance.

DRY COW LIC

Nutrition from Dry-off to Calving

Concerns: Supplement far-off to close-up dry cows, extra nutrients to meet dry cow demands.

Formulated for dairy and beef cows in early or late stages of a dry period. Highly fortified with organic trace minerals. All-natural protein designed to maintain consistent intakes.

Benefits:

- Fiber digester added to unlock nutrients in pastures, forages and feeds.
- High levels of chelated trace minerals improve bioavailability and utilization.
- B-vitamin complex to stimulate appetites and immune function for stressed cattle.
- High levels of Vitamin E shown to reduce intramammary infections (IMI) and clinical mastitis.
- Provides selenium and Vitamin E to complement each other.
- Bio-secure product in 250# tub.

Suggested Feeding: Intake goals of 5 to 11 ounces daily. Provide fresh, clean supply of water at all times. Free choice salt when feeding Dry Cow Lic.

Caution: Do not feed to sheep. This product contains added copper and should not be fed to sheep or other species with low copper tolerance.

44-MAGNUM LIC w/STEALTH 5™

Fresh Cows - Early Spring Pastures

Concerns: Inconsistent intake for high group dairy or fresh cow pens, grass tetany issues.

Free-choice supplement for early spring pastures when grass tetany is a risk, high group dairy or fresh cow pens. Highly fortified with B-vitamins, chelated trace minerals, yeast extract and mannans, and minerals.

Benefits:

- Palatable: uniform consumption of nutrients during stress.
- Magnesium source for early spring pastures and high producing groups or fresh cows.
- Fiber buster added to unlock nutrients in pastures, forages, and feeds.
- Added chelated trace minerals to improve bioavailability.
- Yeast extract and mannans to stimulate immune function and inhibit pathogens binding to intestinal wall.
- Bio-secure product in 250# tub.

Suggested Feeding: Intake goals of 3 to 4 ounces per head per day.

Provide fresh, clean supply of water at all times. Free-choice salt when feeding 44-Magnum Lic w/ Stealth 5.

Caution: Do not feed to sheep. This product contains added copper and should not be fed to sheep or other species with low copper tolerance.

SHEEP LIC

Additional Sheep Formulation

Concerns: Improve forage utilization, save time and labor, option for pasture or confinement feeding.

Designed specifically for sheep and goats. A nutritional supplement that can be fed with various forage feeding programs. Highly fortified with vitamins, chelated trace minerals, and B-vitamins.

Benefits:

- B-Vitamin complex to stimulate appetites and immune function for stressed sheep and goats.
- Low profile tub for easy handling and feeding.
- Natural, self-limiting formulation for sheep and goats.
- Added A, D, & E plus Vitamin C.
- Bio-secure product in 125 lb. tub

Suggested Feeding: Intake goals of 1 to 2 ounces per head per day. Provide fresh, clean supply of water at all times. Free-choice salt when feeding Sheep Lic.
