## HYDRATION & ENERGY SUPPORT TO COMBAT STRESS

## HYDRATION & ENERGY SUPPORT DURING PERIODS OF STRESS

# HYDRO-LAC®

Hydro-Lac is a palatable source of blended electrolytes, multiple energy sources, minerals, vitamins, and osmolytes. From this patented technology, Hydro-Lac provides the nutrients necessary to recover from the effects of heat stress, such as dehydration, and help restore animal health for better all around productivity.

### What makes Hydro-Lac the PROVEN Cattle Hydration Product?

Improves dry matter intake

Transition cows respond to meet their peak potential

Encourages water intake

Replenishes electrolyte balance

Reduces production losses

Enhances production efficiencies

DCAD neutral for dry cows

Re-establishes positive energy balance

Rehydrates during heat and cold stress

Thermo-neutral reproductive effects

# PROVEN

### DAIRY

Published research shows that Hydro-Lac preserves tissue hydration and energy<sup>1</sup>. Field summaries demonstrate that cows fed Hydro-Lac before and during heat stress conditions maintain higher milk production<sup>2,3</sup>.

### BEEF

Research has shown that feeding Hydro-Lac prior to shipping cattle to harvest preserves live weight and meat quality. It reduces the negative effects of dehydration and shipping stress common during transportation.<sup>1</sup>

**"In warm weather, it's a no brainer! It just makes good sense. Hydro-Lac is a tool that should be in everybody's cattle feeding toolbox." - Ron Nykamp**
