Offer Valid Nov. 3 - Nov. 30, 2022

(Offer can not be combined with any other coupons.)

Safe-Guard 0.50% is designed to treat swine, cattle, and horses for internal parasites. This product can be used safely with multi-day feeding rates for swine and one-day treatment for cattle. The milk withdrawal time is zero hours for lactating dairy cattle. Safe-Guard 0.50% is safe to administer simultaneously with vaccines, injectables, implants, sprays, or dips.

FEATURES:

- **Crumble Form** – Minimizes separation of key nutrients for worming.
- **Broad-spectrum** – covers a wide range of parasites (see product tag for full claim).
- **Palatable** – an odorless and tasteless wormer.
- **Multi-specie** – flexible program to treat swine, cattle and horses.
- **Natural Beef** – formulated for feedlot cattle intended for natural beef marketing programs.

BENEFITS:

- **Easy to use** – add to bunk mix, TMR or top-dress based on days of use.
- **Gain advantage** – trials show increased gains and return per head.
- **No milk withdrawal** – safe for lactating dairy cows. Trials show a milk increase of 400-1200 pounds.
- **Flexible** – use on all ages and weight ranges for swine, cattle and horses.
